

## CardExchange® Producer

CardExchange® Producer comes in five editions: Go, Premium, Professional, Business, and Enterprise. All editions support local license activation; however, our Business and Enterprise editions can be purchased either as a local license or network licenses which support centralized data and license management.

Get started in just a few clicks with an easy-to-use wizard for card creation and database set up, you can get started in just a few clicks. With an advanced card designer, we give you all the tools you need to create the perfect card for you in a simple and fun way.

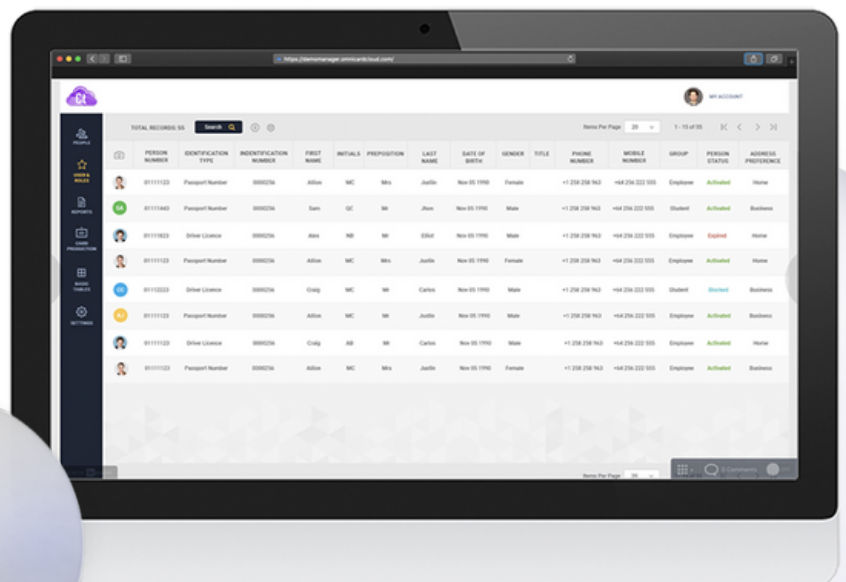

### Stand Alone License

A license that can be locally installed on a machine. Once licensed, the application looks for the license file in the location specified by the program. This license type can only be used on one workstation, as it ties itself to the machine ID. Each workstation will need its own licensing information.

### Network License

A license that allows several users on the same network to share access to product licenses. This licensing type is controlled by the License Manager and can be installed on one or more servers. You can add Clients depending on the maximum amount of concurrent/simultaneous users needed. From card layouts, database connections, profiles, all data can be shared among the users!

**Note: This license is only available for Business and Enterprise Edition.**
